**Call for Participation:
IASUR Student Workshop 2016 on Asian Approach to Urban Regeneration
in Yogyakarta, Indonesia**

To IASUR members,

IASUR (International Alliance for Sustainable Urbanization and Regeneration, founded in October 2014 in Kashiwanoha, Japan) is planning to hold a student workshop on “Asian Approach to Urban Regeneration” with a special focus on Krapyak Area in Yogyakarta, Indonesia in collaboration with Universitas Gadjah Mada (Gadjah Mada University) from August 8 to 13, 2016. The workshop consists of lectures on Asian approach to urban regeneration from professors of IASUR member institutions, workshops on analysis, planning and design of urban environment (including buildings, infrastructures, public spaces, communities, etc.) and a final presentation. The organizing committee of the IASUR Student Workshop 2016 in Yogyakarta, Indonesia would like to call for participation to professors providing lectures and directing workshops as well as to students participating in lectures and workshops.

1. Dates and Place

Dates: From August 8 to August 13, 2016
Place: Universitas Gadjah Mada, Yogyakarta, Indonesia

2. Potential Participants

Professors and students of IASUR member institutions in the fields of architecture, civil engineering, environmental engineering, planning and urban design.

3. Participation Fee and Travel Cost

Registration fee is USD100.
All travel costs including air/ground transportation, accommodation and food should be paid by participants. IASUR will provide travel information including accommodation, but NOT cover the costs.

4. Program

- August 8 Registration
Introduction, Lectures on Asian approach to urban regeneration in various countries
Site visit (Krapyak Area) and discussion
- August 9 Grouping based on students' expertise and interests, Group work, Short lectures
- August 10 Group work
Interim presentation and discussion
- August 11 Group work
- August 12 Final Presentation
(at 3rd International Conference on Indonesian Architecture and Planning)
- August 13 City Tour (optional)

5. Workshop Output

Each group should prepare four A1-size posters for the final presentation showing the results of analysis, planning and/or design of urban environment of Krapyak Area. Each group can focus on particular approach or element of sustainable urban regeneration.

Participants should bring their own computers and/or any other tools needed for discussion, drawing and analyses. Basic information about Krapyak Area will be provided in prior to the workshop.

6. About Krapyak Area, Yogyakarta, Indonesia

Yogyakarta City is a city in Indonesia with the population of around 400,000 and the area size of 32.5km². The city has its “imaginary axis” from Mt Merapi in the north to Indian Ocean in the south, part of which is called “philosophical axis”: Tugu Monument – Malioboro Street – Palace (*Kraton*) – Krapyak Stage (*Panggung Krapyak*) (Figure 1). Indeed, every effort has been made to keep the identity of the city consisted of these urban axes. For example, the renovation of Malioboro Street has just lunched based on the urban design competition held in 2015.

Under the rapid urbanization, population increase and high development pressure can be observed in peripheral districts near the ring road including Krapyak Area. The area, which has kept historical as well as comfortable living environment, particularly in and around noble residences located there, is being dynamically changed (Figure 2).

Where is Krapyak Area going? There is a need to analyze the current physical condition and the trend of transformation of the district and to propose a vision and a strategy to regenerate urban residential environment while conserving historic assets.

7. Important Dates

- June 27 Application deadline (17:00 JST)
- Email the application sheet, available at IASUR website (<http://www.iasur.org>) to Organizing Committee at workshop2016@iasur.org.
- July 30 Pre-study meeting (10:00-12:00 at Hongo Campus, The University of Tokyo)
- The study materials will be emailed to those participants outside Tokyo.
- August 9-13 Workshop

8. Organizing Committee

Atsushi Deguchi

*President, International Alliance for Sustainable Urbanization and Regeneration
Professor, Department of Socio-cultural Environmental Studies, Graduate School of Frontier Sciences,
The University of Tokyo*

Yasunori Akashi

*Vice President, International Alliance for Sustainable Urbanization and Regeneration
Professor, Department of Architecture, School of Engineering, The University of Tokyo*

Bin Lu

*Vice President, International Alliance for Sustainable Urbanization and Regeneration
Department of Urban and Regional Planning, Peking University*

Hironori Kato

*Vice President, International Alliance for Sustainable Urbanization and Regeneration
Professor, Department of Civil Engineering, The University of Tokyo*

Aya Kubota

Professor, Department of Urban Engineering, School of Engineering, The University of Tokyo

Akito Murayama

Associate Professor, Department of Urban Engineering, School of Engineering, The University of Tokyo

Norihisa Shima

Associate Professor, Department of Regional Development Studies, Toyo University

Ikaputra

Professor, Department of Architecture and Planning, Gadjah Mada University

Bambang Hari Wibisono

Professor, Department of Architecture and Planning, Gadjah Mada University

Muhammad Sani Roychansyah

Assistant Professor, Department of Architecture and Planning, Gadjah Mada University

9. Further information

Further information is available at IASUR website (<http://www.iasur.org>), or contact to Organizing Committee at workshop2016@iasur.org
